

PROBLEM SOLVING - HEAVIEST TERRESTRIAL ANIMALS (METRIC UNITS)

Terrestrial animals are animals that live on land rather than in the sea.

The table below shows some of the heaviest terrestrial animals in the world.

Animal	Average Mass (tonnes)	Nearest tonne
African bush elephant	4.9	
Asian elephant	4.15	
African forest elephant	2.8	
White rhinoceros	2.1	2
Indian rhinoceros	1.9	
Hippopotamus	1.8

- 1) Round each of the weights to the nearest tonne, and fill in the nearest tonne column.
- 2) How much heavier is the white rhinoceros than the hippopotamus? _____ tonnes
- 3) How much heavier is the African bush elephant than the African forest elephant? _____ tonnes
- 4) What is the difference in weight between the Indian rhinoceros and the African forest elephant? _____ tonnes
- 5) A tonne is 1000kg. How many kg does an Asian elephant weigh? _____ kg
- 6) Tyger says that the African bush elephant is heavier than the 3 lightest animals in the table. Is he right? _____
- 7) Tyger says "An African bush elephant is heavier than 2 white rhinoceroses." Is he right? _____

PROBLEM SOLVING – HEAVIEST TERRESTRIAL ANIMALS (METRIC UNITS) ANSWERS

Terrestrial animals are animals that live on land rather than in the sea.

The table below shows some of the heaviest terrestrial animals in the world.

Animal	Average Mass (tonnes)	Nearest tonne
African bush elephant	4.9	5
Asian elephant	4.15	4
African forest elephant	2.8	3
White rhinoceros	2.1	2
Indian rhinoceros	1.9	2
Hippopotamus	1.8	2

http://en.wikipedia.org/wiki/Largest_organisms

- 1) Round each of the weights to the nearest ton, and fill in the nearest tonne column.
- 2) How much heavier is the white rhinoceros than the hippopotamus? **0.3** tonnes
- 3) How much heavier is the African bush elephant than the African forest elephant? **2.1** tons
- 4) What is the difference in weight between the Indian rhinoceros and the African forest elephant? **0.9** tons
- 5) A tonne is 1000kg. How many lb does an Asian elephant weigh? **4150** kg
- 6) Tyger says that the African bush elephant is heavier than the 3 lightest animals in the table. Is he right? **White rhino + Indian rhino + hippo = 2.1 + 1.9 + 1.8 = 5.8**
African bush elephant = 4.9. So he is not right.
- 7) Tyger says “An African bush elephant is heavier than 2 white rhinoceroses.” Is he right? **African Bush = 4.9** **White rhino = 2.1.** **2.1 x 2 = 4.2**
So he is correct.
