FIND THE 2 DIGITS! SHEET 3

Tyger Salamander has stolen 2 digits from the pack of digit cards.

He tells the other salamanders that he will give them back if they can guess what number he has made with them.

He tells them:

- My number is less than 70 but bigger than 30.
- My number is a multiple of 4.
- One of my digits is even and one of my digits is odd.

What 2 digit number could he have made?

FIND THE 2 DIGITS! SHEET 3 ANSWERS

Tyger Salamander has stolen 2 digits from the pack of digit cards.

He tells the other salamanders that he will give them back if they can guess what number he has made with them.

He tells them:

- My number is less than 70 but bigger than 30.
- My number is a multiple of 4.
- One of my digits is even and one of my digits is odd.

What 2 digit number could he have made?

The 2 digit numbers he could have made are:

32 36 52 56

All the numbers in the 4 times table are even, so it had to be the tens digit that was odd.
