## FIND THE 3 DIGITS!

Tyger Salamander has stolen 3 digits from the pack of digit cards.

He tells the other salamanders that he will give them back if they can guess what number he has made with them.

He tells them:

- My number is more than 600 but less than 800.
- The 3 digits add up to 15.
- My number is even.

What 3 digit number could he have made?

## FIND THE 3 DIGITS! ANSWERS

Tyger Salamander has stolen 3 digits from the pack of digit cards.

He tells them:

- My number is more than 600 but less than 800.
- The 3 digits add up to 15.
- My number is even.

What 3 digit number could he have made?

The 3 digit numbers he could have made are:

618 ~~636~~ 654 672 690 708 726 744 762 780

However, you can't make 636 or 744 from one pack of digit cards (as there is only one of each digit), so extra points for spotting that!
