## MULTIPLYING BY MULTIPLES OF 10 SHEET 1

1)	$4 \times 3 = \underline{\quad}$	so	$40 \times 3 = \underline{\quad}$	and	$4 \times 30 = \underline{\quad}$
2)	$2 \times 7 = \underline{\quad}$	so	$20 \times 7 = \underline{\quad}$	and	$2 \times 70 = \underline{\quad}$
3)	$3 \times 2 = \underline{\quad}$	so	$30 \times 2 = \underline{\quad}$	and	$3 \times 20 = \underline{\quad}$
4)	$5 \times 4 = \underline{\quad}$	so	$50 \times 4 = \underline{\quad}$	and	$5 \times 40 = \underline{\quad}$
5)	$2 \times 8 = \underline{\quad}$	so	$20 \times 8 = \underline{\quad}$	and	$2 \times 80 = \underline{\quad}$
6)	$6 \times 5 = \underline{\quad}$	so	$60 \times 5 = \underline{\quad}$	and	$6 \times 50 = \underline{\quad}$
7)	$3 \times 8 = \underline{\quad}$	so	$30 \times 8 = \underline{\quad}$	and	$3 \times 80 = \underline{\quad}$
8)	$9 \times 2 = \underline{\quad}$	so	$90 \times 2 = \underline{\quad}$	and	$9 \times 20 = \underline{\quad}$
9)	$4 \times 7 = \underline{\quad}$	so	$40 \times 7 = \underline{\quad}$	and	$4 \times 70 = \underline{\quad}$
10)	$5 \times 3 = \underline{\quad}$	so	$50 \times 3 = \underline{\quad}$	and	$5 \times 30 = \underline{\quad}$
11)	$3 \times 9 = \underline{\quad}$	so	$30 \times 9 = \underline{\quad}$	and	$3 \times 90 = \underline{\quad}$
12)	$6 \times 2 = \underline{\quad}$	so	$60 \times 2 = \underline{\quad}$	and	$6 \times 20 = \underline{\quad}$
13)	$3 \times 7 = \underline{\quad}$	so	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$	and	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
14)	$4 \times 4 = \underline{\quad}$	so	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$	and	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
15)	$7 \times 5 = \underline{\quad}$	so	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$	and	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
16)	$6 \times 4 = \underline{\quad}$	so	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$	and	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
17)	$5 \times 9 = \underline{\quad}$	so	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$	and	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
18)	$5 \times 5 = \underline{\quad}$	so	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$	and	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
19)	$9 \times 4 = \underline{\quad}$	so	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$	and	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
20)	$4 \times 8 = \underline{\quad}$	so	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$	and	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$

## MULTIPLYING BY MULTIPLES OF 10 SHEET 1 ANSWERS

1)	$4 \times 3 = \underline{12}$	so	$40 \times 3 = \underline{120}$	and	$4 \times 30 = \underline{120}$
2)	$2 \times 7 = \underline{14}$	so	$20 \times 7 = \underline{140}$	and	$2 \times 70 = \underline{140}$
3)	$3 \times 2 = \underline{6}$	so	$30 \times 2 = \underline{60}$	and	$3 \times 20 = \underline{60}$
4)	$5 \times 4 = \underline{20}$	so	$50 \times 4 = \underline{200}$	and	$5 \times 40 = \underline{200}$
5)	$2 \times 8 = \underline{16}$	so	$20 \times 8 = \underline{160}$	and	$2 \times 80 = \underline{160}$
6)	$6 \times 5 = \underline{30}$	so	$60 \times 5 = \underline{300}$	and	$6 \times 50 = \underline{300}$
7)	$3 \times 8 = \underline{24}$	so	$30 \times 8 = \underline{240}$	and	$3 \times 80 = \underline{240}$
8)	$9 \times 2 = \underline{18}$	so	$90 \times 2 = \underline{180}$	and	$9 \times 20 = \underline{180}$
9)	$4 \times 7 = \underline{28}$	so	$40 \times 7 = \underline{280}$	and	$4 \times 70 = \underline{280}$
10)	$5 \times 3 = \underline{15}$	so	$50 \times 3 = \underline{150}$	and	$5 \times 30 = \underline{150}$
11)	$3 \times 9 = \underline{27}$	so	$30 \times 9 = \underline{270}$	and	$3 \times 90 = \underline{270}$
12)	$6 \times 2 = \underline{12}$	so	$60 \times 2 = \underline{120}$	and	$6 \times 20 = \underline{120}$
13)	$3 \times 7 = \underline{21}$	so	$\underline{30} \times \underline{7} = \underline{210}$	and	$\underline{3} \times \underline{70} = \underline{210}$
14)	$4 \times 4 = \underline{16}$	so	$\underline{40} \times \underline{4} = \underline{160}$	and	$\underline{4} \times \underline{40} = \underline{160}$
15)	$7 \times 5 = \underline{35}$	so	$\underline{70} \times \underline{5} = \underline{350}$	and	$\underline{7} \times \underline{50} = \underline{350}$
16)	$6 \times 4 = \underline{24}$	so	$\underline{60} \times \underline{4} = \underline{240}$	and	$\underline{6} \times \underline{40} = \underline{240}$
17)	$5 \times 9 = \underline{45}$	so	$\underline{50} \times \underline{9} = \underline{450}$	and	$\underline{5} \times \underline{90} = \underline{450}$
18)	$5 \times 5 = \underline{25}$	so	$\underline{50} \times \underline{5} = \underline{250}$	and	$\underline{5} \times \underline{50} = \underline{250}$
19)	$9 \times 4 = \underline{36}$	so	$\underline{90} \times \underline{4} = \underline{360}$	and	$\underline{9} \times \underline{40} = \underline{360}$
20)	$4 \times 8 = \underline{32}$	so	$\underline{40} \times \underline{8} = \underline{320}$	and	$\underline{4} \times \underline{80} = \underline{320}$
